The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/594,472	Applicant(s) DAHLBERG, GORAN	
	Examiner Clark F. Dexter	Art Unit 3724	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 23, 2010 has been entered.

Drawings

2. The drawings were received on August 23, 2010. These drawings are **acceptable-in-part**.

The replacement drawing for Figure 1 is acceptable.

The replacement drawing for Figure 4 is NOT acceptable because the wrong occurrence of numeral 28 has been changed, particularly in view of the corresponding change to paragraph 0008 of the specification.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3724

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 12-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Matsuura, Pub. No. 2004/0237317.

Matsuura discloses a device with every structural limitation of the claimed invention as described in detail for claim 1-11 in the previous Office action (mailed 2/23/10). For example, regarding claim 12, Matsuura discloses the following:

a drive unit (e.g., see the end of paragraph 18) that via a shaft tube (e.g., 1) is connected to a cutting unit (e.g., 5) that is operable to have a cutting movement and that is turnably secured at the shaft tube and is moveable between a transport position and a working position range at least two positions, the cutting unit being provided with one or several moveable cutting elements (e.g., including 3, 4) that have a cutting movement during operation of the cutting unit,

wherein the tool is provided with first means (e.g., 22, including the structure shown in Figs. 1, 2) for locking operation of the cutting unit and the cutting movement of the cutting elements when the cutting unit is in the transport position,

wherein the tool is provided with a gear (e.g., 14) arranged between the shaft tube and the cutting unit,

wherein the gear comprises a gear housing formed by a first and a second gear housing part (e.g., one of 6, 7) that are turnably supported to one another,

characterized in that one of the gear housing parts is provided with a knob (e.g., the reciprocable portion of 1 as shown in Fig. 4 indicated by the double-headed arrow, and including 20) that engages a stop member on the other gear housing part in order to limit the angular motion of the cutting unit to the working position range.

Response to Arguments

5. Applicant's arguments filed August 23, 2010 have been fully considered but they are not persuasive.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
